PRODUCTION

harvested between early September - early October. pressed immediate. then spontaneous fermentation. aged in stainless steel. 5 months on fine yeast.

CHARACTER

We've been thinking about a rosé for our portfolio for a long time. With pink our/my aim is to make something really contrary to the countless fruity and refreshing summer-rosés on the market. And what can be said is that there are still a lot of ideas in my head cause I love to think outside the box. So <by Theresa Haider> should reflect this new style in our winery.
